

Assisted Publishing for Amazon and Non-Amazon

Hello Authors. If you want to publish your books quickly but don't want to get into the technicalities of publishing I offer a unique service called **Assisted Publishing**. By technicalities I mean activities like Formatting the Paperback & eBook Interiors, Designing their Covers, Converting them to Multiple Digital Publishing Formats, Upload and Configure on Amazon/Non-Amazon sites, etc. For authors who are new to publishing learning all these tasks can be a time consuming and daunting prospect.

If you use my affordable assisted self-publishing, I will publish **your** book on **your** behalf from **your** author/publishing account and make it available worldwide within 10-15 days. You will have 100% ownership of your account, content, copyright, and will also get all royalties directly into your bank account.

The publishing process is as follows.

Publishing on Amazon

	
Kindle	Paperback

When you publish on Amazon your book will be available in Paperback and Kindle in all countries where Amazon delivers. This has the following activities.

Create your Author/Publisher Account

Step-1: I will guide you to create your OWN author/publisher account on Amazon KDP linked to your OWN phone number and bank account to get royalties. It's a simple 20 minute one-time activity. It's recommended to have a new email id for your author/publisher account if possible.

Creating the Paperback and Kindle Interior

Step-2: You have to give me your FINAL manuscript in Microsoft Word format. Your manuscript should also contain the initial

details like *Title, Sub-title, Author Name, Book Summary, About Author, Acknowledgements, Dedication, and Foreword*. Using this I will create the Kindle and Paperback **INTERIOR** files. The files will have clickable table of contents, drop caps, and all chapters will start on right page (if required).

Step-3 – You can also give Keywords, Genre, and the price range you wish to sell.

Creating the Paperback and Kindle covers

Step-4: I will also create **SIMPLE MINIMALIST** Kindle and Paperback **COVERS** for the above interiors. You can search for a cover image you like from free sites like Pexels or Pixabay. I need a portrait image for eBook cover and a landscape image for the paperback cover. Both preferably dark shade for better title contrast. I will use those images for creating the covers.

Samples of my covers look like this on Amazon or Apple

[Amazon](#) [Apple](#)

Step-5: But if you want **grand sophisticated covers** then you are free to get it done from external professional cover designers by directly paying their design charges. A great site for superb covers is – <https://thebookcoverdesigner.com/shop/> but prices

range from US\$50 to US\$200 for an eBook cover, and Paperback covers may range from US\$100 to US\$300.

Step-6: If you go with Step-5 method then you have to ask your cover designer to create **two high resolution files**. A JPG file in Portrait for Kindle cover and a PDF file in Landscape for the Paperback cover. The paperback cover should have a **Front-Spine-Back** and the spine should have your book title and author name. I will tell the exact height-width-spine sizes for the paperback only **AFTER** I create your paperback interior.

Publishing your Book

Step-7: Then you will have to temporarily share the amazon login details with me. I will login on your behalf and upload/publish the book. This activity may require you to be available online with me for 10-15 minutes when I start uploading. This is because I will need an OTP that comes to your phone for logging in.

Step-8: If you can't be available online due to time zone issues or do not wish to share the login, then I can give you a step-by-step **instruction video** on how to upload/publish yourself. This method is **preferred** so that you can learn the upload process and do the job at your convenient time.

Step-9: Once Amazon approves your book it will be available online worldwide in Kindle and Paperback within ten days.

That's it

Now you have self-published your book, have 100% ownership of your book, and will get 30% to 70% royalties from amazon for sales. All royalties will go directly into your bank account. But you will **NOT** get any free copies from amazon, but you can order your own paperback at a good author discount.

Publishing on Non-Amazon Sites

Plus Dozens of eBook Sites and Libraries

The above process was for publishing only on Amazon. If you want your book to be available for sale on Apple iPad, Kobo

Reader, B&N Nook Reader, Android Devices, etc., I can assist you for those also for a **small extra fee**. But the file format is different for these sites. The publishing process is the similar but your Author/Publisher account will be on a different aggregator site and payment will be to a **PayPal** account.

Finally, once you publish on both Amazon and Non-Amazon sites your book will be available worldwide in both Paperback and all eBook formats. This means readers can buy/read your eBook for any type of smart device they own even in places where Amazon has no/limited delivery.

Note: The book will be published in the **exact way** you have written. There will be no editing/proofreading/corrections of the **contents. Also, it's your responsibility to ensure that your content** is plagiarism free. Or your account may get locked. And if the book is full of photos extending to the page edges or from left to right page like a National Geographic Magazine then I need to experiment with the file creation before accepting the project.

Any questions please ask.

Note – For mutual security and terms of service, all conversations, bids, file attachments, payments, contracts, deliverables, etc., must happen within this platform only
